

My urine will be fertilizing

**ORIAZ®**  
**Urinette**

Me too!

## Your Ecological Freedom.

It's a Unisex Individual Urinal. It can be used sitting or standing.

The Oriaz **URINETTE** collects your urine to fertilize plants.  
Just dilute urine between 2 % and 25 % and apply with the **ORIAZ Solar-Dripper**.

Your urine can also be applied undiluted in compost or spread under trees.  
Carry your surplus to a collection point for eco-fertilizer farm use.

Benefits of the agronomic enhancement of your urine :

- You save 8 liters of drinking water for each use (about 18 m<sup>3</sup> of water and € 72 per year).
- You reduce your greenhouse gas emissions by up to 11 %.
- Avoid eutrophication of waterways and the concentration of endocrine disruptors.
- Reduce visits to the public toilets with the risks associated with covid or other diseases.
- Ideal solution for camping, festivals, your travel or emergency situations.
- Your fertilizing urine can be more efficient than some chemical fertilizers.
- The phosphorus is already soluble and is not contaminated with Cadmium.
- This durable solution prevents nitrate fertilizer explosions risks (Beirut, AZF etc.).
- Use your **ORIAZ URINETTE** in any WC or your dry toilet.
- Carry you urine in free plastic bottles from 500 ml to 2 liters.
- Usable for medical tests. Sterilizable at 100°C or with alcohol.
- Compatible with washing machine and dishwasher. Transportable in a zip bag.
